

RÉSUMÉ

Bryan Williams Souto Silva

Full-stack developer. I build products and ship them — with real clients on the other end.

Bauru, SP — Brasil bryanwilliams.s.silva@gmail.com +55 14 98837-2000 linkedin.com/in/bryansouto
github.com/bryansoutu

Computer Science student (graduating 2027) with two web products in production serving real clients. I work end to end: I talk to whoever owns the problem, define scope, build it in TypeScript/Next.js and keep it running after launch. Looking for a developer role — internship, junior or trainee.

EXPERIENCE

Web developer (independent projects)

JUN 2026 — PRESENT

NYO Telecom • Meteoros Rock Band • Remoto — Bauru, SP

- Shipped and maintain two production sites: nyotelecom.com.br (internet provider, live since 2026-08-11) and bandameteoros.com.br.
 - The provider site ships in four languages — Portuguese, English, Spanish and Chinese — with separate tracks for home and business customers and lead capture persisted to Supabase.
 - The band site has a tour agenda (with .ics calendar export) and a store with cart and order checkout, designed phone-screen first.
 - PageSpeed 95 mobile / 100 desktop on the band site, backed by 67 unit tests and 7 end-to-end flows running on both desktop and mobile.
 - Gathered requirements directly with the business owner, prioritized scope, and handled deploy, domain and post-launch maintenance.
-

IT Intern — Support and Infrastructure

APR 2025 – SEP 2025

Unimed Bauru • Bauru, SP

- Technical support for users in a hospital environment, with high ticket volume and tight response expectations.
- Preventive and corrective hardware maintenance — desktops, printers, peripherals — and network cabling.
- Worked in a corporate Windows environment with Active Directory, learning first-hand what process, documentation and security really cost.
- That infrastructure perspective feeds straight back into development: understanding the machine on the other end changes how you write software.

EDUCATION

B.Sc. in Computer Science

JAN 2024 – DEC 2027

Faculdades Integradas de Bauru (FIB)

COURSES AND STUDY

Python from Zero to Advanced

3 modules × 40h – completed between 2024 and 2025

Curso em Vídeo

JavaScript

40h – in progress

Curso em Vídeo

Artificial Intelligence and LLMs

Anthropic (Claude) API, prompt engineering and integrating AI into applications

Self-directed study

LANGUAGES

Portuguese Native

English Intermediate — fluent reading of technical documentation
